User Guide

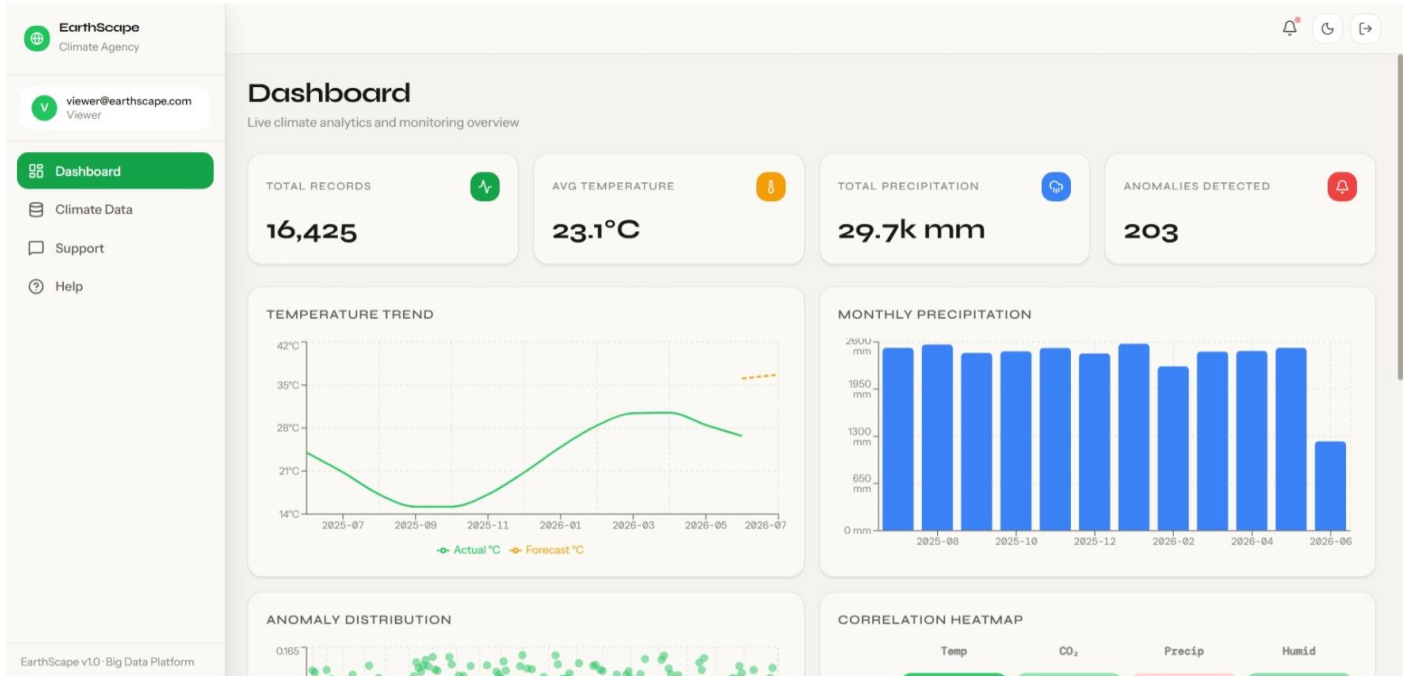

1. Login Page

- Secure login for registered users.
- Default credentials provided for first-time access.
- Option to switch between light and dark mode.

2 Dashboard

- Displays **summary metrics**: total records, average temperature, total precipitation, anomalies detected.
- Includes **visual charts**: temperature trends, monthly precipitation, anomaly distribution, correlation heatmap.

3. Climate Data Explorer

- Browse datasets by region (Karachi, Lahore, Islamabad) and source (weather station, satellite, sensor).
- Records table shows temperature, precipitation, humidity, CO₂ levels, anomaly status, and timestamp.
- Export datasets as CSV for offline analysis. *(Insert Climate Explorer screenshots here)*

The screenshot shows the EarthScape Climate Explorer interface in a light theme. The left sidebar contains the EarthScape logo, user information (viewer@earthscape.com), and navigation links for Dashboard, Climate Data (highlighted), Support, and Help. The main area is titled 'Climate Explorer' with the subtitle 'Browse and export climate records'. It features a filter bar with dropdowns for Region (Karachi), Source (All), and Anomalies (All), along with date pickers for 'From' and 'To' (both set to dd/mm/yyyy). An 'Apply' button is present. Below the filter bar is a table of records. The table has 8 columns: REGION, SOURCE, TEMP °C, PRECIP MM, HUMIDITY %, CO₂ PPM, ANOMALY, and TIMESTAMP. The table shows 16,425 total records. The data rows are as follows:

REGION	SOURCE	TEMP °C	PRECIP MM	HUMIDITY %	CO ₂ PPM	ANOMALY	TIMESTAMP
Karachi	weather_station	29.3	2.23	71.3	416.9	No	Jun 15, 2026, 04:00 PM
Karachi	satellite	29.6	0.00	70.9	413.6	No	Jun 15, 2026, 04:00 PM
Karachi	sensor	31.1	2.27	69.5	415.6	No	Jun 15, 2026, 04:00 PM
Lahore	weather_station	26.3	2.39	58.8	418.8	No	Jun 15, 2026, 04:00 PM
